

Vouch: Company Fact Sheet & Press Kit

Vouch is the all-in-one digital storefront building the financial and technological infrastructure for the African creator economy, starting in Monrovia, Liberia. We allow local experts, educators, and creators to sell digital products, host video courses, and book consultations with native integration for local payment methods.

For years, brilliant Liberian creators and educators have been locked out of the global internet economy. Foreign platforms like Patreon, Gumroad, and Kajabi do not support Liberian bank accounts or Mobile Money, making it nearly impossible for local experts to monetize their knowledge without relying on complex workarounds or third-party middlemen.

Vouch bridges this gap by providing world-class software natively integrated with the payment rails Liberians use.

- **Digital Storefronts:** Creators can launch a beautiful, secure storefront in minutes.
- **Robust Product Types:** Support for downloadable files, streaming video courses, and 1-on-1 calendar bookings.
- **Native Payments:** Seamless checkout using MTN Mobile Money, Orange Money, and local bank transfers.
- **Fast Liquidity:** A reliable T+2 payout schedule directly to a creator's MoMo wallet or bank account.
- **Like-for-Like Settlement:** Protection from FX fluctuations. Earn in LRD, withdraw in LRD. Earn in USD, withdraw in USD.
